PORTLAND, SATURDAY, NO. 6, 1886;

DO WE GROW WORSE!

President Eliot thinks that young men do not the state of the s ing in politics. If Enut is right then we expect to be ruled either by men who are ron or by men who mean to get rich by plundering their public trusts. So far as the uncleanitiess of politice and their indecent spirit are experienced, the field is purer to-day in both baginard and America than it was one hundred years are when we remember that we are 10,10 10,000 to day against 3,000,000 in 170) that our great metropolus of New York contains 1.500,000 against 80,000 a century ago As late as 1810 New York city had only 95,000 people, and In 1850 it had but 515,000 Allowing for this wast increase of population it is probably from that our field of politics is relatively units as pure as It was in the days of Washington and Jefferson, and purer than the politics of highard, in spite of the fact that their election laws are severe and their suffrage limited, compared with the universal belief in America. Bribery at elections is as old as 159 B C, when Rome punished bribe givers by exile. Subsequently a law was passed, fining a candidate who attempted to bribe an elector and depriving him forever of the right of holding office or sitting in the senand right of noting office or sining in the sen-ste, and the law construed giving the people a banquet or a gladiatorial show as a bribe. By the time of Julius Casar these laws were violat-ed with impunity. Bribery was a common prac-tice with courts and juries under Henry the Eighth, Lord Bacon was disgraced for bribe taking under James the First, and political bribery became an organized system under Charles the Second. In the time of George the Second, under Walpole, every man had his price. The first Lord Holland, father of Charles James Fox, was conspicuous for his peculations, and for his allowed to steal. In 1807 the election expenses of so good a man as William Wilberforce were \$300,000, and in 1867 the Enghah Beverly bribston reported that out of a constitueacy of 1100 about 800 were open to brib-ery and other corrupt influences, and the case of Hoverly was only one sample in a multi-ude of instances of prevalent bribery So corrupt is the English field of politics that a

feroclous business in the early days of the re-public. To-day President Cleveland is described were full of the charges against these great men. Hamilton's papers describe a cabinet meeting where Washington brokes into profanity on reading a newspaper article charging in mith a treasonable purpose to make himself king. Coarse caricatures were circulated exiting him as a dethround king placed upon the guillutine. The National Operate published. at Washington by Freneau, a creature of Jeffersaid, "The man who is the source of all our country's misery is this day reduced to the rank So ferocious was party spirit that Washington reactive Jacob Name rayed the charge with great traceres. The Chicago Jourant spoke a true word the other day when it said, of the tendency of the time to magnify crime and to incu cate a false belief that the ad-ministration of public affairs is totally deprayed, that "men assert wildly sometimes that all politicians are open to briber and that every man in public life has his price. Nothing could be farther from the truth. The great majority of

A BROTHER'S MISTAKE

No one is wise at all hours, says the proverb and we observe that our good (atholic brother, Roy Verhuag, o' Fast Pertiand, is no exception to the rule. The other day he found this in THE GREGONIAN

It would be a matter of real curlosity to be an what specific Mr I awderly and Mr teners, he was for abolition of poverty in the case of that a which are intemperate and indolent of those woers in the fill-click either in their natural or activity of the ers of thuse who are not vigitable in making the most of opportunities, of those with are not provi-dent economical and self-density, of those who dent economical and self-dunying of these have increased their families by that that have increased their families 1-y-1 all limit and pradence and beyon tall means of support that could be reasonably expected.

The last part of this paragraph Brother Ver hase, in a letter to the *Cr our Sent net*, callen "immoral passas"," and he proceeds to write in this way about it

write in this way about it.

What do you mean Orrgonnian, by the about passage? Can at be possible that you adon it abortion infunicide and all the borrible or it against nature committed by the corrupt and debased society of our age. For the sake of your honor explain yourself or stand convicted of exintenancing the most degrating practices. Why Orrgonian you have butterly opposed the chaton of Mitchell to the United States square for his supposed corruption and depravity (how trut these charges were it is not our duty to investigate) and now you do not hesitate to advocate cuese enarges were it is not our duly for investi-gate) and now you do not hesistate to advocate crimes which leave in the shade all the pratent of faults and fralities that Seuntor Mitchell could over-be guilty of Once more for your fair names sake, explain yourself and save your bonor and rep; tation

examine THE ORECONIAN'S statement so as to get its real meaning, which is a very simple and proper one and could not be mistaken by any body who had his usual wits about him, much ess did he reflect upon the subject. Had he done either he would not have written in this

I et us look at the passage which gives the rether offense "It would be a matter of real brether offense "It would be a matter of real curlosity to learn what specific Mr Powder! and Mr George have for abolition of poverty in case " * " of those who have increased case of those who have increased their families beyond all limits of prulence an inberond all imeas of support that could reason ably be expected. In this the brother can see nothing but suggestion of "abortion" and "in orease their families beyond the limits of pru-dence and beyond means of support, Brother Verhaag is unable to see what remedy or is source they could have, save the horrib e crime he names Nevertheless, intelligent married persons of decent habits of mind and body of produce, judgment, forecast, in whom there is sense of responsibility to God, to society, to children, to themselves, may have and all sh wid have a virtue in continence beyond what the colibate clerical mind plainly imagine

cace, perhaps the brother who criticises us will be able to mame it. And these who are duly mpressed with a sense of this responsibility be leve that this, above all other functions, should be beld under the government of reason, of judgment, of prudence. To the fact that often it is not, much if the misery of human life is to be, much if the hissip of human life is toe. The father of a large family, who has no alequate means of support for the children he are, and jet brings others into the world, wrongs society, himsilf uil his offspring the children he has, lut scandy fed and clothed, for whose physical, intellected and moral wants he has been unable to provide, are followed rapidly by ot ers, whose wants divide and subdivide the meagre supply. Ever deepen ing poverty and misery are the natural, and in most cases the theritable, consequences. Yet, Low comes the celebate preset to say that there is no remedy for this, save "abortion" and "in-As he talks of "scorn" for the suggestion that would inculcate protience, judg ment and continence as virtues, woulghtre-tort with "scorn" of an idea so gross in itself

It is not surprising, perhaps, that thoughtless persons of gress minds and gross babits should and do increase their families beyond all the limits of prudence, taking no thought of their responsibility or other consequences, but it may well be a marvel why the clerical celibate should think it difficult or impossible to the state. chould think it difficult or impossible for them to yield to restraints of prudence or to the virtue of regulated continence, and should be the hist to attack the suggestion that it is their duty

To restate the original proposition "It would be a matter of real curron ity to learn what specific Mr Powder ly and Mr George have for abolition of poverty in the case of those who are intemperprovided independent of those who are intemperate and undependent of these who are inefficient either in their natural or acquired powers, of those who are not provided of opportunities, of those who are not provided of opportunities. lent, economical and self-denying of those who have increased their families beyond all

forms some years ago. Inder his management the republican party of that state was directly lefert, as the republican party of Gregon has so-ften been under Mitthell's manipulation. The secent campaign in California opened with excellent prospects for the republicios. There seemed to be no reason to doubt that the victory
of 1884 would practically repeat uself. But soon after the campaign opened Sargent again entered the lists as candidate for the United states senate and began to "set up" things al' litical bosses of the Sargent-Mit. hell stang this at once checked the ardor of the republic in annuage. that state as thoroughly as Mitchell has corrected the politics of this, but he lacks the nortous infancy of Mitchell's private character. The republican party will be continually bester in local elections so tops as men of the Singent Mitchell type are at the front.

THE OBLIGORIAN receives many long obstumy articles, testimonials of respect, resolutions of condedence, etc., which it is unable to public in full. To attempt to publish all matter of this kind that is offered it would make a demand upon its space which it could not possibly meet it will publish in brief form all notices of deaths that may be recognized but in public in the could not possibly meet. that may be requested, but it cannot do more Within the last ten days there has been sent for THE ORFGONIAN from different parts of the Northwest an amount of obliquary matter that would fill many columns. We make this state ment in order that it may be understood why the articles have not been printed. It is impo-able to print all matter of this kind, and there I left becomes necessary to make a general rule.

So corrupt as the English field of politics that a "corrupt and illegal practices prevention act" was passed in 1883, which contains very minute and stringent provisions. Not only are English politics more corrupt than our own, but they are more brufal and ferocious. The Belfast riots are a conspicuous example, but if we deem them exceptional what shall we say to the o her termble industrial and political riots that have disfigured the history of England during the reign of Victoria what shall we say to the fact reign of Victoria what shall we say to the fact that the mob smashed he windows of Welling ton's house and stoued his carriage, that taled stone's carriage has been repeatedly stoned that election mobe have often assaulted and heaten English gentlemen of vank an i family,

APPLES FNOTCH, AND COOD ONFS—There, has been a general impression that apples were scarce this fall and this has been borne out by the prices charged by some grovers. But from the quantities of apples coming into foun daily it seems exident that there is no scarcing of that fruit, and this very of the case is bothe out by the prices paid farm reby other grocers. As long as wagon loads of apples can be seen on every other corter along Frint street no one ment fear about being forced to forego his wholesome dish of apples sance or his quarter section of plain honest apple pie. The apples are good, too. Occasionally a wormy lot is seen but that horrible pect the codile moth has not found out all the orchards in Oregon yet by a long shot.

SLOW ABOUT ANSWERENG.—The date for the proposed competitive arill between the Scattle Rifles and Company G O S M, of Portland has not yet been fixed. Nearly two weeks have clapsed since the Portland company sent an agreement embracing ferrom notucinly agreeable to be signed by the Scattle company, but thus far there has been no response It is hardly possible that the track company of the (picen city of Poget sound are going to weaken at the last moment, so they may as well conclude preliminaries and allow an early date to be lixed for the event. Portland is a little short on nouncements this fail, and 2000 or more of us in the absonce of opera of chasticelas would like to spend an evening witnessing a compositive drill

Benaior Stanford Talks of Connecting British Columbia with Mexico

SAN FRANCISCO Nov 5— The prowth of (all forms and Senator Stanford this afternoon, has been rapid during the past lew years but I think that it will grow yet more rapidly and that the next few years will see the northern part of the state develop very fast. Our road having been completed through to New Orleans we are paying attention to the building of lateral lines. When we built easiward we thought to control the trade west of Lie Rocky mountains for California, but the completion of other roads prevented that. Wheever controls the carrying trade generally could be connected. Now we are the building a north and could be sufficiently be the completion of other roads prevented that Wheever controls the carrying trade generally could be connected. Now we are the building a north and the country in the building and the City of Mexico and every line from the East must touch our north and south line somewhere. The completion of the Oregon line is of the greatest importance to California and argue and to San Francisco and particularly to the northern part of the state. Oregon how has a population of about 200 cc0 and Washington territory has shout 200 cc0 and Washington territory has greated a fruit country as Bouthern California, and in some respects better. With the completion of our northern line the fruit of Northern California, and misupply both Oregon and Washington territory and will also that a market along the base of both the Canadian and Northern Paddie roads. The kinds of the interior of the states as the Washington Bernald in the benefit will be considerable. The rapid growth of the northern part of the states as are

"The relation of the agricultural interest to the welfare and prosperity of our land is so in timate that its proper and legitimate care and protection is, in my opinion, a particular duty. This consideration elevates the response bility of those in anywise intrusted with our far ning loding the second of the second of the second of the second our land about a house conservation and inderation. Demands made in such a spirit cannot full to exact a jost and appreciative response from those who make and execute our laws."

Mr Cleveland speaks here of protection to the farming interests as a particular and bairy association went so fur in a subsequent resolution as to state exactly the sort of protection they preferred. Their resolution was to this effect;

'That we call on congress to so revise the tariff laws of the country as to protect the agrificultural industries by imposing such duties on cereal and dairy products as to curtail, if not entirely stop, foreign competition in these priductions.

"That the re-enactment of the dity on wolf

"That the re-enactment of the dity on woll charged pustous to 1523 is row untage let as a just protection to the agricultural pursuit of wool growing."

But this is protection out and out. It is protection by a problittory tentiff—more than that by a problittory tentiff.—the protection in the sense opposed to free irade. It is the sort of protection which the gentlemen who protess to have the president's positical conscience in keeping hate and abborrabove all things. It is the sort of protection which they wish to who of of the statutes, and in this artest desire they presend, every man of them, to have the support both of the president of the United States.

We fancy we see, though, in this plain deals ration ad the agriculturists a more tangible foundation for a policy of "conservation and noteration" than even arised in Mr. Cleven and to recommend a protective tariff on cereal and dairy products. But the American agriculturists will, after all, have to be satisfied with elemangarine bills, even when they only amount to a tax of 2 cents on the pound

He would likewise disayow the talk of the patitions specially favored by him in the way of putronage and of his personal infundes, that a second turn is a foregone conclusion. The dignity of his office did hol leaf him to check this effus ceness, the remembrance of his win animal-versions upon the influence of executive subordinates and partisan adherents in security a renomination of the president would lead him to put a stop to the very polyticus second term movement if he had not changed the mind.

We speak of it as a matter of fact, not of feeling. It is, as we have before remarked, very to turn that the president should desire a second form. And his clitical and personal course in the past year is only appliance upon the trony that he does desire it. There was a moment of awful suspense as the procession whited for the Hon. Samuel clumber is step into his carriage. Suddenly the crowd set up a great cheering. "He has come of it," said little Mr Perker, greatly excited, the more so as their position did not enable them to see what was going forward. Another cheer, much louder "He has shake; hands with the men," clied the little agent. Another cheer, far more rehement. "He has hat at the hables on the head," said Mr Perker tembling with anxiety. A roar of applause that set the air. "He has kissed one of 'em,' exclaimed the delighted little man. A second roar. "He has kissed an other,' graped the excited manager. A third roar. "He's kissing on all" screamed the enthusiastic little gentleman. And, haised by the deafering shouts of the multitude, the procession moved on
